ABOUT

I am a Full-Stack Developer with extensive knowledge of a modern technology stack for web development. I can build single-page applications using React. I also have experience in server-side development with Node.js (Express.js, Koa.js, Meteor), as well as in hybrid/mobile development with React Native and Cordova.

Being a self-driven and proactive person, I always try to come up with new ideas and approaches when working on projects.

LANGUAGES

Ukrainian – native

English – upper intermediate

Russian – native
